

# SOLUTIONSplus learning programme

This course programme enables organisations from the public sector to learn about the concept and practical implications of e-mobility. Learners are introduced to the overall topic, given examples of electric vehicle types and learn about case studies that implement e-mobility in an urban mobility context.

28 January 2021 to  
28 March 2021

## Project

SOLUTIONSplus goal is the European Union's international cooperation flagship to establish a global platform for shared, public and commercial e-mobility solutions to kick start the transition towards low-carbon urban mobility.

It encompasses city level demonstrations in Hanoi (Vietnam), Pasig (Philippines), Lalitpur/Kathmandu (Nepal), Kigali (Rwanda), Dar es Salaam (Tanzania), Quito (Ecuador), Montevideo (Uruguay), Madrid (Spain) and Hamburg (Germany) to test different types of innovative and integrated e-mobility solutions, complemented by a comprehensive toolbox, capacity development and replication activities.

The project has a runtime from January 2020 - December 2023. You can find more information at [www.solutionsplus.eu](http://www.solutionsplus.eu)

## Learning programme

The SOLUTIONSplus learning programme is a first-of-its-kind global training on e-mobility solutions spanning the entire value chain. It will provide you with knowledge and insights from city and regional authorities, industry, research, implementing organisations and financing partners.

The programme follows an Open University approach, combining online courses, webinars, face-to-face trainings and interactive exchange sessions. In addition to interviews with leading experts in e-mobility, courses will also provide students with additional materials such as policy papers, tools, fact sheets and good practice case studies.

## Learning goals

You will be provided with a balanced and multi-faceted perspective comprising insights on suitable policy frameworks, operational models and scenarios for business set-ups to foster e-mobility in your city or region. Our aim is to be representative of the various contexts, sectors and operational environments e-mobility can take place in and manifest itself. Different kinds of electric vehicles and operational models will and approaches on integration into existing concepts will be presented. Regular tasks will ensure practical applicability and peer exchange will help to understand differences and commonalities between challenges all over the world.

All courses are provided free of charge and free for anyone to join at any time (self-paced).

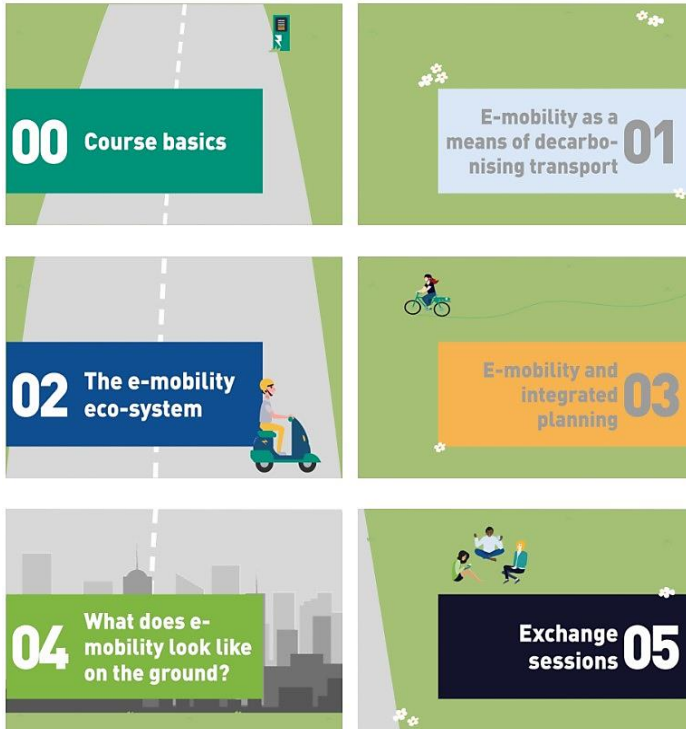

## Certification

Upon completion of each SOLUTIONSplus learning programme course, a certificate of completion will be provided and the learning material will maintain accessible to all students.

The first course of the SOLUTIONSplus global learning programme on electric mobility aims to provide a comprehensive introduction to electric mobility planning and implementation in local contexts.

**E-course 1 structure**

The course consists of four thematic units: First, e-mobility is contextualised in the pursuit of decarbonising our transport systems. Secondly, a link between e-mobility and integrated planning is established. An overview of the e-mobility eco-system is presented and relevant sectors, stakeholder needs, as well as operator requirements, are mapped. Furthermore, students learn about good practice examples of policy measures and incentives to support the electrification of transport.

It is primarily designed for city and regional authorities but aims to provide a solid knowledge basis for any stakeholder involved in electric mobility.

In addition to lectures and material for self-study, a kick-off webinar gives key information and guidance about the learning programme and the SOLUTIONSplus project. Virtual exchange sessions are scheduled to accompany the course enabling interactive discussions with and among participants.

This way, the course serves to establish a general framework to be built upon in all upcoming courses.

**E-course 1 schedule:**

Unit	Launch date	Closing date
0 <i>Kick-off webinar</i>	28 January 2021	
1 <i>E-mobility as a means of decarbonising transport</i>	01 February 2021	14 February 2021
2 <i>The e-mobility eco-system: stakeholder needs and requirements</i>	15 February 2021	28 February 2021
3 <i>E-mobility and integrated planning</i>	01 March 2021	14 March 2021
4 <i>What does e-mobility look like on the ground?</i>	15 March 2021	28 March 2021
