

SOLUTIONSplus Regional Kick-off Webinar Latin America

Wednesday, 29th April 2020

16:00 – 18:00 CEST

Description

Given the global spread of COVID-19 and the related travel and gathering restrictions that have been enforced worldwide, the kick-off meetings planned by the EU-funded project SOLUTIONSplus (SOL+) in its Latin American demonstration cities had to be cancelled. However, in order to establish the necessary partnerships, inform relevant stakeholders and start defining the activities that will need to be conducted in each city in the context of SOL+, we have decided to organize a Regional Kick-off Webinar with Quito and Montevideo. This webinar will also serve involved SOL+ partners to have a better overview of the on-going activities and design their contributions to the demos accordingly. Given that both cities are currently in the process of implementation of their public transport electrification strategies, the focus of this first webinar will be on technical specifications for e-bus procurement and charging equipment.

Agenda

- | | |
